Ignored and overlooked, the dragons go unnoticed. just like George. But one rainy Thursday, lonely George sees his first dragon. Before long, they are everywhere, and the trouble begins. Since he is the only one who can see them, George knows he must lead the dragons back to the great wilderness where they belong-and then somehow find his way home again.

This beautiful story by the creators of The Tin Forest shows the power of the imagination not only to create but also to liberate.

Illustrated by Wayne Anderson.
