Successful trading is not what you think. There s more To Trading than Just Having a Strategy In trading magazines as well as web sites that list trading system results they all seem to highlight the trading strategy of the month . If it were so simple to buy one of these systems you would have retirement in a box. The problem is that strategies Do NOT make a good trader. This book is not about any magical methodology or indicator that claims win rates of 80% or more (by the way the vast majority only lose money chasing these type of concepts). Actually this book will hopefully give you an AHA experience what successful investing is really all about. True successful investing is never taught in school or even graduate school. More so in my career spanning more than 19 years I never came across a book that.
