LOCUS magazine has called Sheri S. Tepper "one of SF's most distinctive voices." Few writers in any genre possess her astonishing ability to combine intelligence, imagination, humor, and humanism in equal measure. Her latest novel is yet another remarkable feat of world-building that employs uncommon insight, literary creativity, and truth to say much about our own sphere. An accomplished student and heiress to a great title, Genevieve has been well brought up to be a Proper Young Lady on the isolated, seemingly backward planet of Haven. She has been carefully instructed in the Covenants - the inflexible laws governing the women of her class - and knows she must soon take up the time-honored responsibilities of adult womanhood: to marry a nobleman of her father's choosing in her mid-twenties and to bear a child at age thirty. There is another Genevieve, however, who does.
